

BRITISH INFANTRY TANK «CHURCHILL»

PAPER MODEL FROM THE «PAPER ARMY»

HISTORICAL REFERENCE

Infantry Tank Mk.IV «Churchill» (A22) - a heavy infantry tank of the British army during the Second World War. Delivered to the USSR under the Lend-Lease program. Designed in 1939-1940, serially produced from 1941 to 1945, and became one of the most numerous British tanks of the Second World War. Like all «infantry» tanks «Churchill» was notable for its low speed, but powerful booking (frontal armor 101 mm, later brought to 152 mm) ensured the effectiveness of combat use until the end of the war. By the end of the 1950s, the Churchill was withdrawn from service, but a number of these tanks in a flamethrower version took part in the Korean War.

WHAT IS THE TANK TAKEN FOR THE BASIS OF THE PAPER MODEL?

The Churchill's personalized model is based on the design, paintwork and emblems of a tank from the British Tank Museum in Bovington called «Guildford». The original tank has a turret with smooth contours, it is difficult to do this with paper of this scale, the rear turret box is still missing on the paper model; during battles, tankers sometimes removed it, in particular when preparing for transportation or using the fascina frame. In all other respects, the tank has the insignia, paintwork and emblems of this original tank. The tank itself fought in the 8th British Army and took part in the battles at El Alamein, as well as in Tunisia.

PRINTING INSTRUCTIONS

To print a model of a tank, you need to select sheets of a document with a template, printing is carried out on A4 sheets (international format, 210 by 297 mm), if you have a different paper size, it's okay, you can print on it, the main

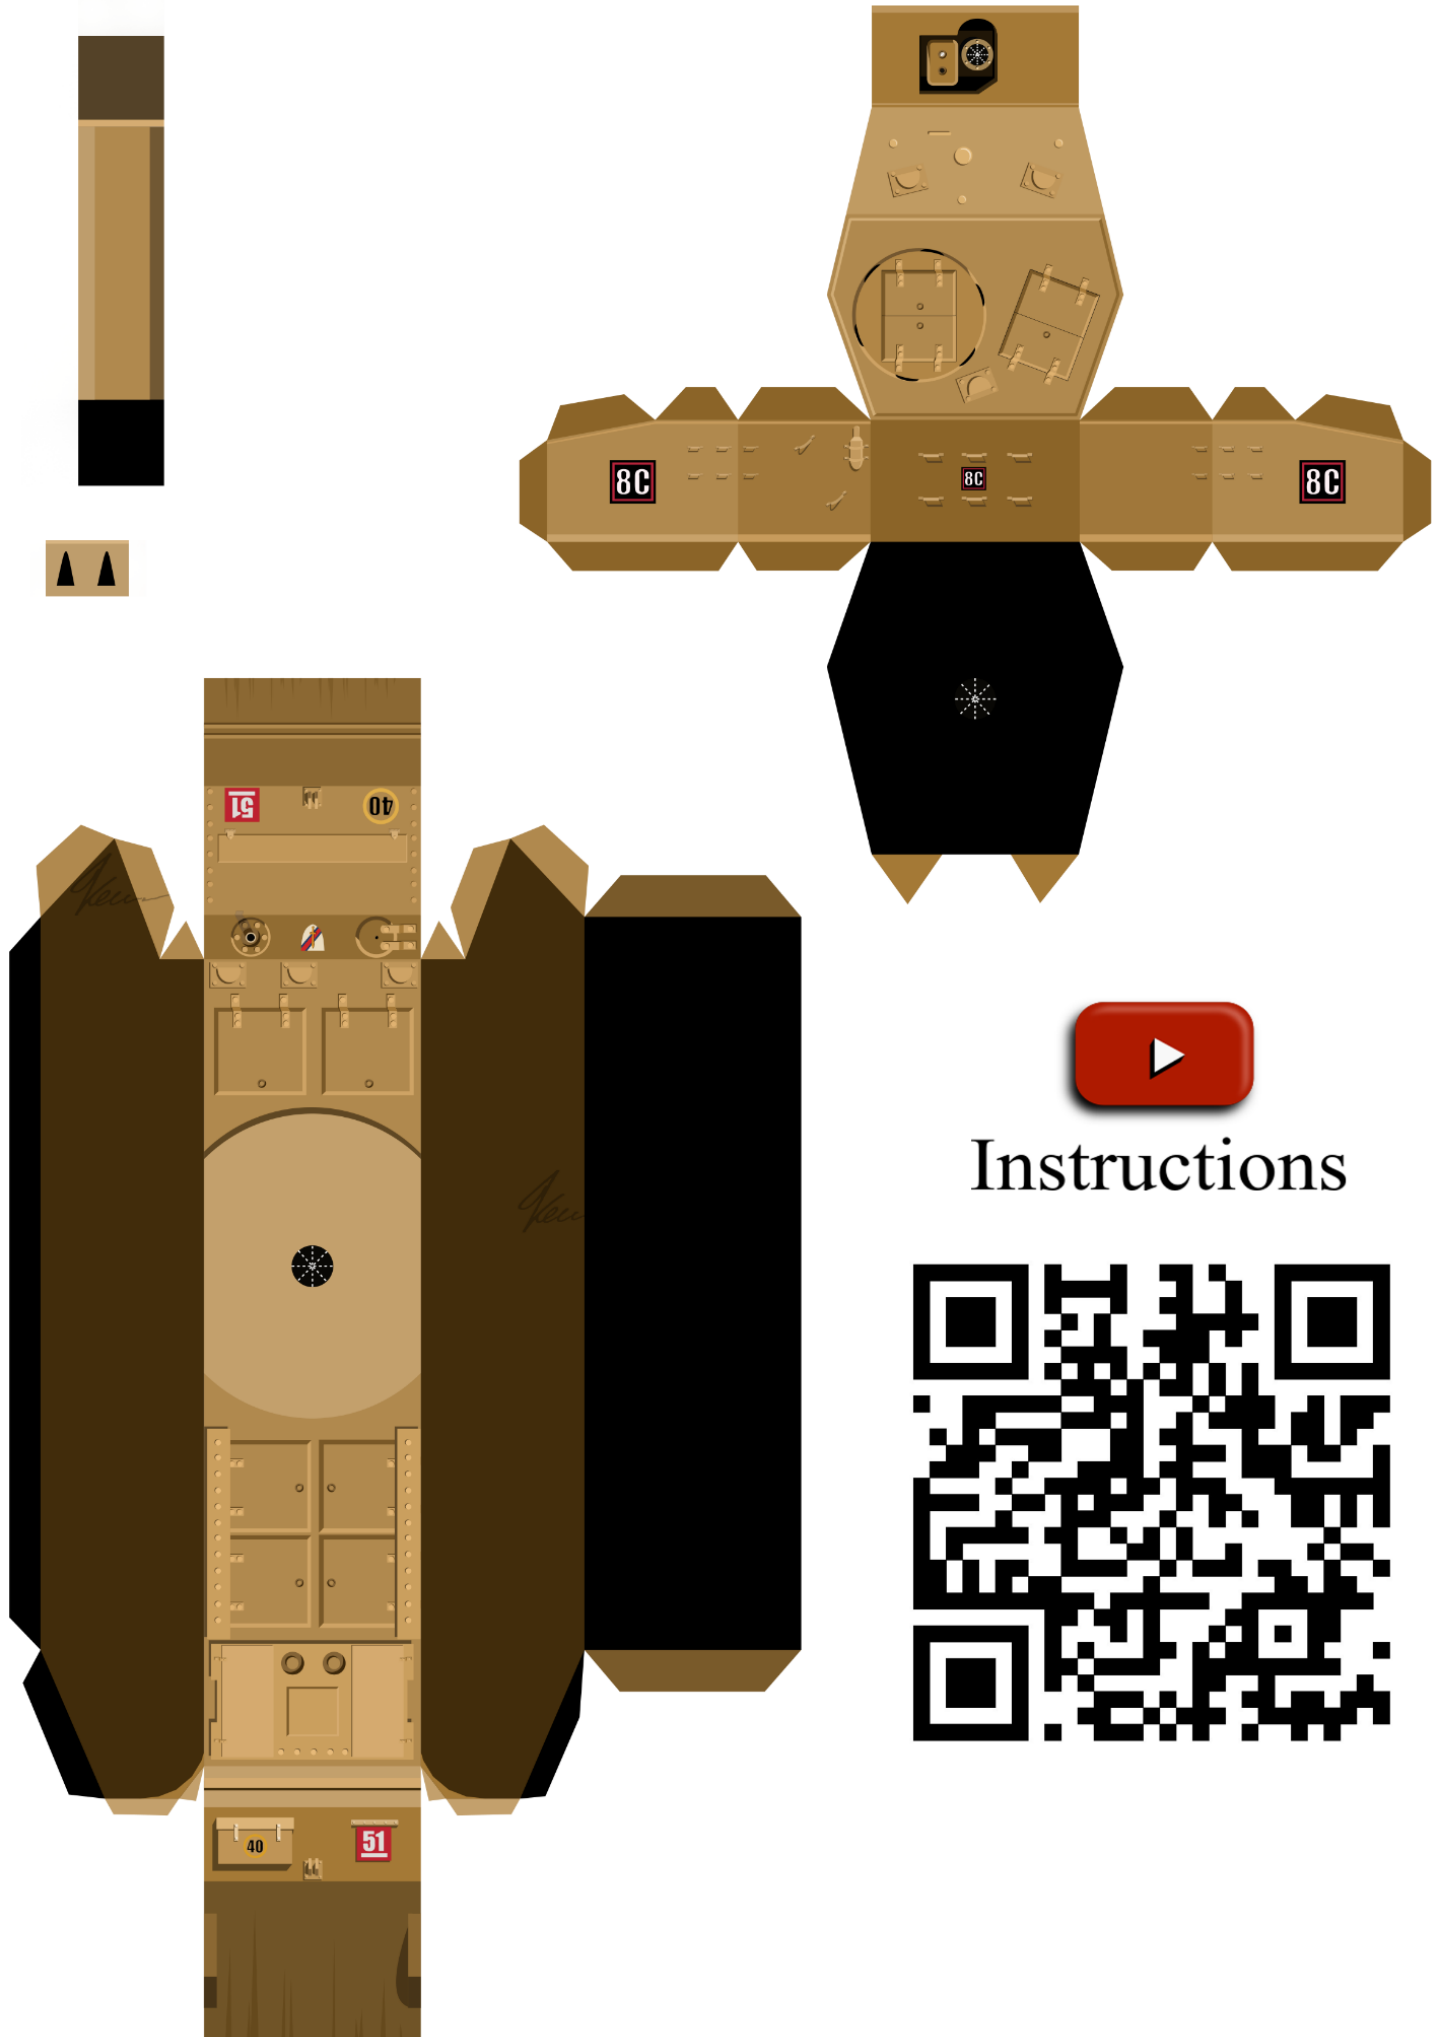

thing in this case is do not stretch on the whole sheet (violation of the aspect ratio of the sheet), since this will change all the dimensions of the model, if, when printing on a different format, it turns out that there is an empty space on the sheet - let it remain, if the model is reduced in size, this is also not scary, there will be changes insignificant.

CUTTING AND GLUING INSTRUCTIONS

For all models, a separate video assembly instruction is provided, this video is available on my "Paper Army" YouTube channel at this link - ["Churchill tank video instruction"](#) (Rights reserved, commercial use is prohibited, deposit has been made).

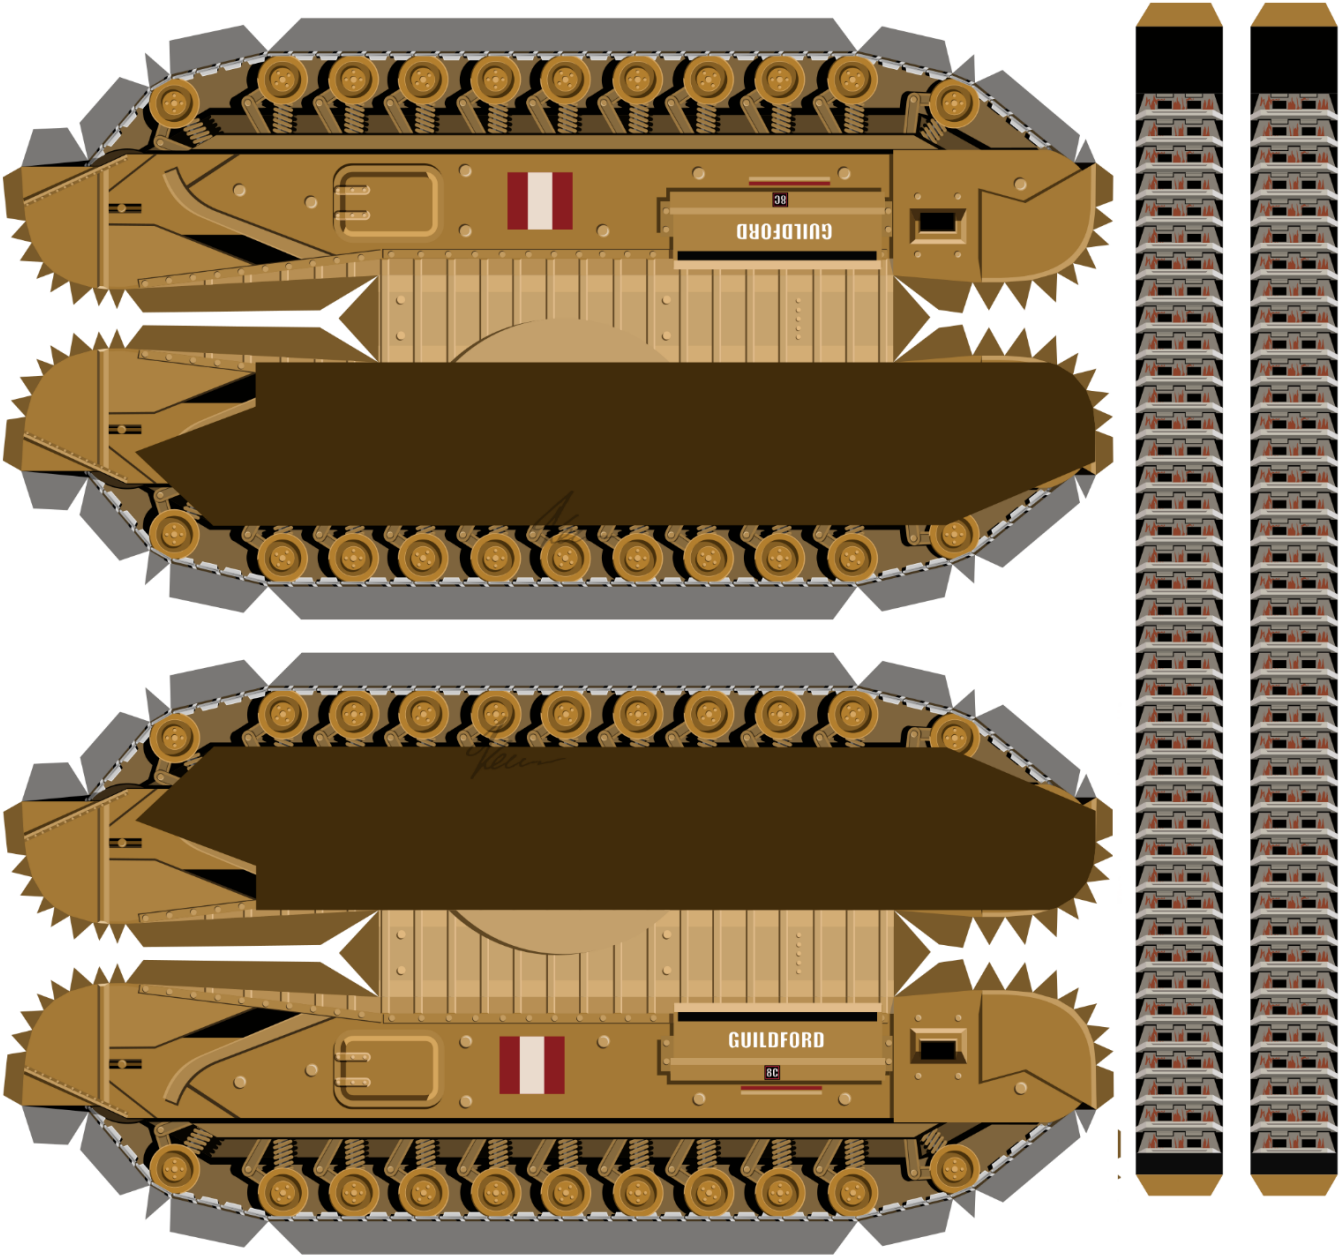

FRIENDS

All models are free, but they are created with difficulty to support the author of the models and the "Paper Army" channel **watch the video on this link to the end** - ["Video Review of the Churchill Paper Tank"](#), this is a video with a review of the assembled the same model of the Churchill tank You downloaded, with epic music, watching the video **to the end, like and commenting will help** the channel in promoting and other lovers of collecting paper models will see the video and also come to the channel - this is the best support, **thanks;)**
